

ABC CO

Outstanding Automation Experience

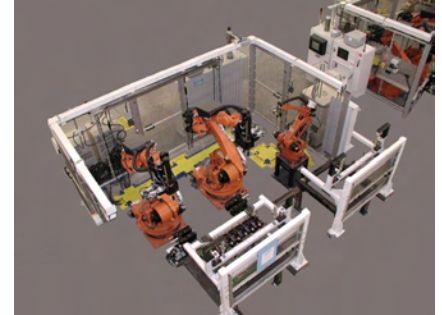

From our beginning designing and manufacturing packaging and filler systems for the beverage industry, to our present day leadership role in automation, ABCO has followed a basic principle of standing behind our work. We realize that solving complex automation challenges requires a talented engineering staff, a responsive manufacturing organization and project managers dedicated to customer satisfaction. Our strength in these areas sets us apart from our competition and ensures a positive experience with us.

Whether it's automating a process, reducing cycle time, or improving existing equipment, ABCO will work with you to ensure smooth implementation and optimal performance.

Systems and Services

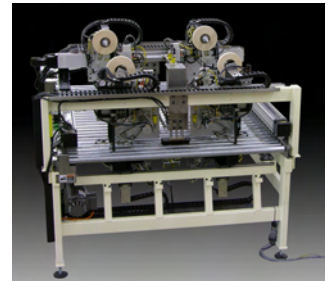

Packaging & Material Handling

- Packaging Equipment and Line Integration
- Specialized Handling & Conveying
- Control Systems Integration

Assembly and Test

- Automatic Assembly Systems
- Lean Manufacturing Workstations
- Robotic Work Cells
- Leak, Vision, and Functional Test Systems
- Lasers – Weld, Solder, Mark & Cut

Manufacturing Capabilities & Contract Services

- Metal Fabrication and Machining
- Contract Engineering Support
- Build to Print Equipment
- Certified Electrical Panels

Our headquarters, in Greensboro, NC, is over 100,000 square feet. In addition to our large assembly area, which can support multiple projects, we have extensive metal fabrication and machining capability that enables us to provide shorter lead times, competitive pricing and consistently high quality.
